

SUNRAY

SRF618 K9 MATERNAL / FETAL MONITOR

12.1 inches TFT color screen, 0-70 degree foldable; CTG curve and numeric display simultaneously.

Monitor the maternal and fetal parameters simultaneously.

Fetal parameters: FHR, TOCO and FM.

Maternal parameters: NIBP, SPO2, PR, ECG, RESP and TEMP.

- ◆ Insight software and USB for data transmission to PC.
- ◆ Signals overlap verification to separate twins and triplets FHR.
- ◆ Wired & wireless network module to connect central work station.
- ◆ Can monitor two pregnant women simultaneously with two-bed CTG graph display.
- ◆ 12.1" TFT-LCD foldable color screen. Black, green and pink color display interface can be easily switched.
- ◆ The touch key and shuttle button can help the operator to simplify the workflow and work with one button only.
- ◆ Professional CTG analysis system meet the needs of obstetrical department in offices, clinics and hospitals.
Real-time analysis function: Automatically calculate and analyze the parameter indexes.
- ◆ Integrated wireless waterproof transducer module. The probes can be used universally to all of Sunray Fetal Monitors. Highly sensitive 12-crystal probes provide wider beam and more stable and homogeneous signal.
- ◆ Monitor the maternal and fetal parameters simultaneously, Fetal parameters: FHR, TOCO and FM; Maternal Parameters: NIBP, SPO2, PR, ECG, RESP and TEM. Both Fetal and maternal parameters can be output and printed.

Standard Configuration: FHR, TOCO, FM, AFM, NIBP, SPO2, PR, ECG, RESP and TEMP

Optional Configuration: Twins FHR, Triplet FHR, Wireless transducer, Touch screen, Li-ion Battery
